The Research Experiences For Undergraduates (REU) program offers research opportunities at 10 multi-hazard engineering equipment sites during a 10-week summer research program.

Study areas include earthquake, wind, tsunami, coastal engineering, data management and cyberinfrastructure.

Benefits of Participation

- **WORK** with experienced faculty and graduate students
- **WRITE** a professional, publishable research paper
- **NETWORK** with peers in research group meetings
- **LEARN** about graduate school and career development
- **BUILD** relationships through mentoring
- **GAIN** hands-on research experience

**REU Block 1: May 30-Aug. 7, 2018**
University of Texas-Austin
Lehigh University
Florida International University
University of Florida

**REU Block 2: June 18-Aug. 24, 2018**
University of Washington
Oregon State University
University of California-San Diego
University of California-Davis
University of California-Berkeley

**APPLY NOW**
www.designsafe-ci.org/learning-center/reu/application

Application deadline: Feb. 1, 2018

Undergraduates participate in hands-on, research-based projects in earthquake, wind, tsunami, or coastal engineering. Sites also include data management and cyberinfrastructure components.

Travel funding provided, including stipend for room and board for the 10-week summer program. Underrepresented minority, women, and veteran undergraduate students are encouraged to apply.

“I got to see the flexibility, freedom, and unexpectedness that comes with conducting research and how everything helps shape you into a confident individual.”
